

Esker on Demand Reaches Key Milestone: Over 1 Billion Pages Processed!

Sydney, Australia — July 3, 2014 — Esker, a worldwide leader in document process automation solutions and pioneer in cloud computing, today announced that its cloud-based service, Esker on Demand, has processed over one billion pages. Ten years after its launch, Esker on Demand now serves over 5,000 customers worldwide, reinforcing the trend and increased adoption rates of the cloud model.

Esker on Demand enables companies to automate the reception, processing and sending of purchase requisitions, vendor and customer invoices, collection letters, pay checks, and sales and marketing communication directly from their business applications (e.g., ERPs, CRMs, etc.) by leveraging a suite of cloud-based automation solutions, including: Purchasing, Accounts Payable, Order Processing and Accounts Receivable.

Since 2004, Esker on Demand has achieved continued success thanks to Esker's strategic positioning and development plans in the dynamic market of cloud-based document process automation, as well as its international structure comprised of three data centres in the U.S., France and Australia, and seven mail production facilities in Australia, France, Belgium, Singapore, Spain, the U.K. and the U.S.

25 Million Pages Processed Monthly

Today, organisations around the world use the Esker on Demand platform to process over 25 million pages each month. "In Australia and New Zealand, we are grateful for the confidence and trust of companies like BHP Billiton, Dulux, Visy, GrainCorp, James Hardie, Fonterra, NSW Fire Brigades, etc. In total, 100+ local and multinational companies based in Australia and New Zealand are using Esker Cloud solutions" said Christophe DuMonet, Managing Director of Esker Australia & New Zealand.

"In today's economy, document process automation technology is a key advantage for companies by allowing them to achieve higher productivity and eliminate low-value tasks to focus on their core business," said Jean-Michel Bérard, CEO at Esker. "The success of Esker on Demand reflects this global trend and reinforces our strategic direction."

About Esker

Esker is a worldwide leader in document process automation solutions. Addressing all types of business processes from accounts payable and accounts receivable to order processing and procurement, Esker cloud computing solutions enable companies to automate the reception, processing and sending of any business document with one platform. Esker helps over 80,000 companies across the world to reduce the use of paper and eliminate manual processes while improving their productivity, efficiency and environmental impact.
