

## Esker's 'business process fitness solutions' make the SIIA Software CODiE Award Final 'Best Financial Management Solution'

Esker's Accounts Payable and Accounts Receivable automation solutions earn prestigious software industry award

**Sydney, Australia — April 13, 2015** — Esker, a worldwide leader in document process automation solutions, today announced that its Accounts Payable and Accounts Receivable automation solutions were named as a finalist for the 2015 SIIA Software CODiE Awards for Best Financial Management Solution. The SIIA CODiE Awards are the premier award for the software and information industries, and have been recognising product excellence for 30 years. Winners will be announced during a special virtual SIIA Software CODiE Awards Ceremony on May 7, 2015.

Esker provides '**business process fitness solutions**' for Accounts Payable and Accounts Receivable for both enterprise and mid-size companies.

Esker's Accounts Payable solution optimises the process of verifying, data entry and approval through the use of intelligent capture, touchless processing and electronic workflow capabilities, helping companies save time and reduce costs while improving supplier relationships.

Esker's Accounts Receivable solution allows companies to fully automate the delivery and archiving of paper and electronic invoices in compliance with worldwide regulations, while leveraging a customer portal and collections tools to enhance customer communication and more effectively manage the entire AR workflow.

"Having our Accounts Payable and Accounts Receivable solutions recognised by SIIA is a tremendous honour for our company, and a testament to all that Esker has invested into making our solutions unique and beneficial," said Steve Smith, U.S. Chief Operating Officer at Esker Americas. "Effective management of financial documents is critical for today's organisations, and we're thrilled to be identified as one of the primary leaders in this area of expertise."

"All the CODiE finalists this year showcase innovation and creativity in today's market. We are happy to recognise them for their products that are breaking ground in the software and services industries," said Rhianna Collier, VP & General Manager for the Software & Services Division at SIIA.

"This is a remarkable achievement for Esker AP and AR solutions! Industry awards such as CODiE in the USA combined with the accelerated adoption of Esker's '**business process fitness solutions**' for AP and AR for both enterprise and mid-size companies in Australia and New Zealand clearly demonstrate the business value proposed by Esker," said Christophe DuMonet, Managing Director at Esker Australia and New Zealand.

Details about each finalist are listed at <http://sija.net/codies/2015/finalists.asp>.

## About SIIA

SIIA is the leading association representing the software and digital content industries. SIIA represents approximately 800 member companies worldwide that develop software and digital information content.
