

# Esker Awarded SSAE 16 and ISAE 3402 Type 2 Compliance for Its On-Demand Document Process Automation Solutions

**Sydney, Australia — May 6, 2014 —** Esker, a worldwide leader in document process automation solutions and pioneer in cloud computing, announced today that it has successfully obtained SSAE No. 16 (Statement on Standards for Attestation Engagements) and ISAE 3402 (International Standard on Assurance Engagements) Type 2 compliance for its on-demand document process automation solutions, following an audit conducted by A-lign, an independent auditing firm. Having earned Type 1 compliance in 2012, Esker underwent the Type 2 level examination in order to enhance the level of security and assurance it provides to customers.

SSAE 16 and ISAE 3402 Type 1 reporting determines if an organisation's controls are designed appropriately. For entities new to the world of reporting on controls, Type 1 reporting is typically a stepping-stone to what is ultimately required by service organisations — Type 2 reporting. Type 2 reports include the same confirmation steps involved in a Type 1 examination in addition to an evaluation of the operating effectiveness of the controls for a period of at least six consecutive months. Type 2 reporting not only includes the service organisation's system description, but detailed testing of the design and operating effectiveness of the service organisation's controls.

"Esker is committed to delivering the highest standard of operational excellence for its on-demand customers around the world," said Jean-Michel Bérard, CEO at Esker. "Our compliance with the SSAE 16 and ISAE 3402 Type 2 standard enables us to reassure our partners and customers about the level of control that Esker has over its infrastructure, as well as eliminate any concerns over security."

## About SSAE 16 and ISAE 3402

SSAE 16 and ISAE 3402 are international reporting standards that analyse a service organisation's control over information technology and related processes. Successfully complying with these standards indicates that processes, procedures and controls have been formally evaluated and tested. SSAE 16 and ISAE 3402 standards validate the quality and integrity of an organisation's internal control processes and procedures for on-demand customers and address the rules of internal control outlined in the Sarbanes-Oxley Act legislation.
